Peter Christopher, Richard Skinulis : Log Houses: Canadian Classics before purchasing it in order to gage whether or not it would be worth my time, and all praised Log Houses: Canadian Classics:

Canadians have restored and handcrafted some of the most beautiful log houses in the world, and we're proud to present many of the finest and most interesting in this gorgeous large-format pictorial, with a text by Richard Skinulis discussing historic and modern building techniques used in log houses across Canada.

Informative text is complemented by... beautiful color photographs of numerous impressive log structures... definitely worth a look. (N. Glenn Perrett Cottage Times 2003-07-11) About the Author Peter Christopher and Richard Skinulis
