Byron E. Martin, Laurelynn G. Martin : Logee's Greenhouses Spectacular Container Plants: How to Grow Dramatic Flowers for Your Patio, Sunroom, Windowsill, and Outdoor Spaces before purchasing it in order to gauge whether or not it would be worth my time, and all praised Logee's Greenhouses Spectacular Container Plants: How to Grow Dramatic Flowers for Your Patio, Sunroom, Windowsill, and Outdoor Spaces:

8 of 8 people found the following review helpful. Optional for advanced gardeners By Eileen SI consider this to be a book for a beginning gardener. I didn't get new information out of it and I'm disappointed that they didn't identify many more types of plants, since Logee's has a huge and fascinating inventory. Many of their plants are tropical or subtropical, I thought for sure that there would be some mention of helpful hints for growing tropicals indoors or in colder climates but I didn't see any. I didn't see much in the way of specifics at all. The photography is great, and I don't regret buying it, but I thought it was overpriced for the level of content it contained. 0 of 0 people found the following review helpful. 2016 I am very pleased with the quality By knotty pine Wow-i just ordered this book Oct 6!!! It arrived today Oct 11, 2016 I am very pleased with the quality, glossy color pictures, no worn edges! I ordered another

one as a gift, for a neighbor who also loves different plants. These aren't always available at local garden centers, we can find them online-it's a great day in the neighborhood!!!0 of 0 people found the following review helpful. Logee's Greenhouse Container Plants By C. Lindsay I like this book so much, the information is amazing, they have done a great job in describing these plants. I only wish it covered more plant material from their amazing list of inventory. It is very helpful to read the info on plants listed in their catalog, and disappointing to not see some others listed in the book. I consider the book a catalog reading companion on the happy day the catalog comes in the mail. I do understand that it would in reality be impossible to list all the plants in the greenhouse. I guess it's only a wish on my part. But thanks for a great book.

Logee's Greenhouses is renowned worldwide as a leader in the horticultural industry, and since 1892 has been growing and selling over a thousand varieties of tropical and subtropical container and garden plants for both indoor and outdoor use. In this book, the third-generation owners of Logee's share the 109-year-old family secrets on how to grow exotic flowers. A no-nonsense approach to tropical plant care, coupled with exquisite photographs and inspirational messages, makes this book outstanding in its field. Designed to take the fear out of growing exotics and tropics, the text features 80 of the most popular genera and gives detailed information about how to grow, care for, prune and winter-over these beautiful plants. Specialties include dramatic flowering plants, fragrant plants, angel's trumpets, begonias, passion flowers, gesneriads, jasmines, hibiscus, and hoyas featured in brilliant, large-format color photographs. Also included are sections on soils! and fertilizers, insects and disease, containers and potting, pruning, and trouble shooting. A truly unique gardening choice for any plant lover.

See this award-winning book air on Martha Stewart Living TV Show December 10th. -- Martha Stewart Living TV About the Author Byron Martin is an expert horticulturist and lecturer who turned Logee's Greenhouses from a family business into an internationally-known horticultural company. He and his wife, Laurelynn Martin, have published numerous articles about their exotic plants. They jointly run Logee's Greenhouses, coined by the Washington Post as the "grandfather of the horticultural industry."
