Marcia Muth : Ma Frump's Cultural Guide to Instant Intellectualism before purchasing it in order to gage whether or not it would be worth my time, and all praised Ma Frump's Cultural Guide to Instant Intellectualism:

Why intellectualism, you may well ask. And, my answer would have to be--why not? Isn't it the "in" thing? The pressure is on to be an intellectual or at least to present a faade of intellectualism to a curious and waiting world. Unfortunately, there are many interesting things to do today that are vastly more relaxing and entertaining than the

serious pursuit of knowledge. However, you can, by following the tips in my book, "bake your cake and eat it too." You can become an instant intellectual in a matter of a few hours (two hours?). Your family and friends will be astonished. You will be pleased and not at all exhausted by tiresome mental effort. Instant intellectualism is for the modern individual who would rather be happy than to think deep thoughts. A humor book for everyone.

"A fun book, using acupuncture on pretentiousness with humor and no pain. Can be read in one sitting with one beer." --The Santa Fe New Mexican
