**Jonathan Speirs, Anthony Tischhauser Mark Major : Made of Light: The Art of Light and Architecture** before purchasing it in order to gauge whether or not it would be worth my time, and all praised *Made of Light: The Art of Light and Architecture*:

1 of 1 people found the following review helpful. Great reference  
By Sue  
An insightful and fantastic reference for those studying light and its effects on architecture. I bought it to help me with my course and I was not disappointed!  
2 of 8 people found the following review helpful. good reference  
By Gabriela I. Santos  
Esse livro contém enfoque próprio sobre a possibilidade do espaço arquitetônico tornar-se complexo através da plástica da luz. E ainda chama a atenção para a necessidade de pensar o edifício e da cidade no ambiente noturno

*The Beauty of Light*  
By Richard Pilbrow  
This must be one of the most insightful and beautiful books on light ever written. It should inspire every lighting designer . . . and architect

Our visual world is made of light. We light to see and to communicate. We light for security, to create mood and atmosphere, to enhance and entertain. Where natural light fails man has learned to improvise, constantly developing new technologies to illuminate art and architecture. Our visual experience and emotional reaction to buildings is shaped by the control of light and shadow. Light is increasingly integrated into the fabric of buildings and becomes a part of the architecture. Jonathan Speirs and Mark Major are experienced, award-winning Lighting Architects working internationally at the forefront of lighting design. This vividly illustrated book explores the influences that inspire their work. It investigates the basic properties and qualities of light, presents a sketchbook of ideas and observations, and includes an in-depth interview.

Speirs and Major challenge us to reconsider what is light and how we interact with this subtle and elegant medium. --  
*AI Architectural Lighting*, Dec 2005
