K. And Wada, S. Saito : Magic of Trees and Stones: Secrets of Japanese Gardening before purchasing it in order to gauge whether or not it would be worth my time, and all praised Magic of Trees and Stones: Secrets of Japanese Gardening:

3 of 3 people found the following review helpful. A great book on Japanese gardening. By MichaelInSeattle If you are seeking more information on Japanese Gardening and have pretty much acquired the books that were available in local stores this book can help you move to the next level. Very good details in stone selection, shape, moods and scenic appropriateness. This book helped me clarify challenges I had in "seeing" the direction of stones in some of my first attempts at stone arrangements. Excellent sections on stone arrangement beginning on page 66 including how stone shapes effect symbolism (including mood). Several nice examples aligning with representation illustrated in the book. Pointers on planning and construction starting on page 235. The book also covers the basic divisions of types of gardens front, kitchen, inner and other auxiliary sections of typical gardens in Japan. In that aspect, the coverage of divisions of gardens in the context of a residential home... it gives us all something to contemplate. Beyond a simple little section of your yard, it starts one down the road of Magic Of Trees And Stones... How they can be good for the local neighborhood and western civilization in general. We all need a little more majesty of well cared for trees and gardens. 0 of 0 people found the following review helpful. A Magical Reference for the Enthusiast By David Hill This vintage book is a real treasure for the Japanese garden enthusiast. The private garden examples shown in the work are beautifully documented with BW photographs and overall plan drawings. I'm particularly impressed with the garden owned by "Mr. S" it's an amazing example of thoughtful and imaginative garden design. The book is a must have for inspiration and learning. 0 of 0 people found the following review helpful. Five Stars By Cindycat Just as promised!

Oversized Hardcover.
