Paul Levine : Making Kitchen Cabinets: with Paul Levine (Fine Homebuilding DVD Workshop) before purchasing it in order to gage whether or not it would be worth my time, and all praised Making Kitchen Cabinets: with Paul Levine (Fine Homebuilding DVD Workshop):

8 of 9 people found the following review helpful. Great content, although a bit dated By C. Staton There are some great ideas and techniques in this video. It took me a while to get past Levine's heavy use of plastic laminate, although the information on selecting and applying it was a good review. Levine illustrates great ideas for strong european case construction. The previous reviewer must have watched a different video. While Levine illustrated a face frame cabinet first, he used that only as a comparison to the european style cabinet, which he built during the video. Admittedly, the final product does look very 80's with the laminate and all. Any viewer can take the ideas and,

utilizing more aesthetically pleasing materials, create a beautiful and strong cabinet. If by chance you are looking for techniques for raised panel doors, you will not find any in this video (I wasn't, so it didn't bother me). 0 of 0 people found the following review helpful. goodBy amy abdelold but still can be useful0 of 0 people found the following review helpful. great find, great serviceBy CustomerIt was great to get this out of print book! And so inexpensive, and fast!

Watching Paul Levine will convince you that creating a beautiful kitchen is as easy as building one simple cabinet several times over. Levine's system saves time, anticipates mistakes and allows for corrections. All you need is access to a small workshop with a table saw a router and some common hand tools. What's more, your cabinets will be as handsome as they are strong, featuring sleek lines, hidden hinges, colorful laminated surfaces and warm wood trim. By watching Levine you'll learn how to: laminate plastic to plywood for easy-to-clean surfaces, cut tongue-and-groove joints to assemble the cases, rout dovetails for sturdy, solid-wood drawers, and install trouble-free drawer slides and adjustable hinges.

From Library JournalKitchen designer Levine teaches how to make quality kitchen cabinets in the home workshop using such commonly owned equipment as the tablesaw, router, and hand tools. (As a bonus, his designs produce a superior quality product compared to most store-bought cabinets.) The companion video, part of the Fine Homebuilding Video Workshop listed below, is extremely well done. Copyright 2000 Reed Business Information, Inc.About the AuthorA former newspaper reporter and trial lawyer, Paul Levine lives in Miami. His other Jake Lassiter novels include To Speak for the Dead, Night Vision, False Dawn, and Mortal Sin.
