James W. Wilson : Masters of the Victory Garden: Specialty Gardeners Share Their Expert Techniques before purchasing it in order to gage whether or not it would be worth my time, and all praised Masters of the Victory Garden: Specialty Gardeners Share Their Expert Techniques:

0 of 0 people found the following review helpful. GREAT INFORMATRIONBy Patrick J.REALLY GOOD BOOK ABOUT THIS CLASSIC AND LONG RUNNING SERIES1 of 1 people found the following review helpful. Of interest to would-be specialistsBy David W. PittelliThis book should be of interest to people who are interested in becoming specialist growers, and especially breeders, particularly if they are interested in one of the few plant types covered: Hostas, Daylilies, Roses, Antique Fruit Trees, Herbal Arts, Dwarf Conifers, Peonies, Wildflowers (of the Southeastern woods), Lilies, Peppers. One does learn what it takes to be such a specialist, and the pros and cons of

various plants, but there are better sources for info on each type of plant. There is beginning info on propagation of most of these plant types, and on setting up the landscape and work areas for growing and propagating them. It is not especially helpful for general horticulturists looking for tips on various types of plants. Perhaps "The Well-Tended Perennial Garden" is the best resource for most such gardeners, and/or whichever book best covers a given genus or other category (there are books exclusively on most of these plant types).

Jim Wilson, host of public television's "Victory Garden South," reveals the secrets and techniques of successful hobby gardeners--masters of the gardening craft who specialize in the cultivation of a particular type of plant. Color photographs.
