William J.; Stein, Benjamin; Gay, Charles Merrick; Fawcett, Charles De van McGuinness : Mechanical and Electrical Equipment for Buildings Fourth edition before purchasing it in order to gage whether or not it would be worth my time, and all praised Mechanical and Electrical Equipment for Buildings Fourth edition:

Because of its outstanding treatment of the interrelationship of architecture and engineering, Mechanical and Electrical Equipment for Buildings has earned a high reputation in its field. In the 4th edition the emphasis has been placed upon population increases and on their effect on the problems of obtaining pure water and disposing of wastes. The zoning of services in high rise buildings receives more attention.
