By Anna Cragin I was disappointed a bit, as the book didn't go into a whole lot of detail. It seemed like the author was just giving casual advice, without good organization of the content. Not really worth even the discount price in my opinion, as more detailed info can be readily found online for free.  
6 of 6 people found the following review helpful. Waste of time  
By Auntie Kel There is very little valuable information in this ebook. There is no editing, which leads to confusion of what was actually intended by the author. I feel like it is a poorly spelled free pamphlet.

By Patricia Duboise I was very disappointed, especially for the price charged! It doesn't really tell you anything about HOW to do it. It was more like a magazine article and very general with no real information. The price is ridiculous for a 36 page pamphlet that you can get more information on online! Don't think I'll do business with this seller again.

Today's world is one that has become awakened to the changing nature of food cultivation and supply. Gone are the days when the fruits and vegetables that made it to our plates were sources of vitamins and minerals; today's fresh produce are instead, results of experiments of genetically engineered fresh produce. The food that we rely on as sustenance for our development, is actually giving us little or no nutritional benefit. In order to combat this unhealthy practice of food consumption, people around the world have slowly begun relying on themselves as skilled farmers. The process of growing and cultivating one's own food has been a part of history; today we are learning exactly how useful rearing your own crop and meat was. Setting up own mini farm is a process that may take up time and effort, but reaps huge rewards in the long run. By using a small patch of land and determining what produce you'd like to find in your backyard, you can start your own little green patch of health and nutrition. This book aims to show you how you can turn an uncultivated yet perfectly healthy land in your vicinity into a fully-functioning and thriving independent farm, built to suit your needs.
