Peter Burberry : Mitchell's Environment and Services before purchasing it in order to gauge whether or not it would be worth my time, and all praised Mitchell's Environment and Services:

Environment and Services provides a comprehensive introduction to the technical aspects of building design and construction in the fields of physical environment and services installation. It explains the principles involved, the materials and equipment required, design methods and applications. The eighth edition has been brought fully up-to-date with the current building regulations and reflects recent trends by placing increased emphasis on environmental issues related to buildings. The book is suitable for undergraduate degree courses in building, building surveying, building engineering and management, and architecture. It is also suitable for HNC/D courses in building studies and building services engineering as well as CIOB and RIBA examinations.

From the Back Cover Environment and Services provides a comprehensive introduction to the technical aspects of building design and construction in the fields of physical environment and services installation. It explains the principles involved, the materials and equipment required, design methods and applications. The eighth edition has been brought fully up-to-date with the current building regulations and reflects recent trends by placing increased emphasis on environmental issues. provides one of the most comprehensive introductions to the technical aspects of building environment and services for students, professionals and others with a special interest in these fields fully up-to-date with current building regulations incorporates results of latest research technical data and estimation methods are included for use in exercises and technical applications Environment and Services is an ideal core text for all those studying undergraduate degree courses in architecture, building, building surveying, building engineering and management. It is also suitable for HNC/D courses in building studies and building services engineering and will be of interest to those studying RIBA professional examinations. Peter Burberry is Emeritus Professor of Building Engineering at the University of Manchester Institute of Science and Technology. About this series: Mitchell's Building Series comprises highly practical books for all those studying construction, architecture and related studies at higher technician and degree level. Each book discusses a specific aspect of a building, focusing on the practical and technical issues involved. Necessary building science and theory is provided to explain how and why certain methods and procedures are used. Other titles in the series systematically cover all stages in the construction of a building. Other books available: Introduction to Building Structure and Fabric Part 1 Structure and Fabric Part 2 Internal Components External Components Materials Materials Technology Finishes
