Klaus-Jurgen Sembach : Modern Furniture Designs, 1950-1980s: An International Review of Modern Furniture (Schiffer Book for Collectors with Values) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Modern Furniture Designs, 1950-1980s: An International Review of Modern Furniture (Schiffer Book for Collectors with Values):

0 of 0 people found the following review helpful. Five Stars By Steven Zimbelman Excellent reference material for

MCM furniture, especially European designs. 6 of 6 people found the following review helpful. EnjoyableBy A Customer
After buying four Hans Wegner chairs, I wanted to learn more about these chairs and similar furniture. This book has been a wonderful, educational find. It is simply organized into sections with interesting introductions and has nice black-and-white photographs of the furniture. Each picture lists the name of the designer, his/her country or origin, and the year the piece was designed. This makes it easy to compare designers of the same period working in different countries, or comparing a designer's earlier and later pieces. We have enjoyed spending time becoming acquainted with the masters of mid-century furniture design. One complaint I have about the book is that it lists the values of each piece of furniture. This is a somewhat fruitless endeavor since values are so relative--changing monthly or even daily, especially as you search in different parts of the country, or world. But, this book is a lot of fun for those who are interested in learning more about modern furniture. And, by the way, I did find my chairs in the book!

A comprehensive and abundantly illustrated collection of the most outstanding modern furniture around the world. Now with a guide to current values, this is an indispensable book for collectors, architects, designers, and furniture historians. Over 1000 of the most innovative designs are shown, many of which have become classics of the late-twentieth century. Pieces range from simple modern chair to large pieces and installations. It covers the range of modern materials from wood to plastic, steel to Lucite.
