**Joseph Tanney, Robert Luntz : Modern Modular: The Prefab Houses of Resolution: 4 Architecture** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Modern Modular: The Prefab Houses of Resolution: 4 Architecture:

4 of 4 people found the following review helpful. Knocked off 2 stars for microscopic diagrams and font  
By Customer  
Like the book, but knocked off 2 stars for tiny diagrams and tiny text. I wish architects and designers would think of the usability of their published materials, not just their architectural designs. I will keep this book, but if I had checked/know in advance that it would be hard to read, I would probably not have bought it.

By Joan F. Ellis  
Prefab, with the new guarantees of quality and fast building, offer a really appealing path to home ownership, and Resolution: 4 Architecture offers all that plus appealing designs. Good book.

Prefabricated housing of high design and quality construction has long been an elusive goal for architects, where industry practices, bureaucratic regulations, and cost have always stood in the way until now. The New York-based firm Resolution: 4 Architecture is revolutionizing prefab housing with their Modern Modular design system. Home

designs based on modules of use intended for communal or private spaces are mixed and matched to achieve an infinite number of designs suited to each buyer's site, budget, and lifestyle. *Modern Modular*, the first book on the critically acclaimed firm, presents fourteen beautifully photographed case studies illustrating each step in their prefab system from design and fabrication to transportation, siting, and final construction of distinctively modern and surprisingly affordable new homes.

**About the Author** Joseph Tanney and Robert Luntz founded Resolution: 4 Architecture in 1991. Their 2003 competition-winning entry, the Dwell Home, helped ignite renewed interest in prefabrication. They have since completed dozens more modular homes and have over 100 more in the works--all unique in their layouts and configurations yet born of a shared typological system.
