John Cretti : Month-By-Month Gardening in Utah before purchasing it in order to gage whether or not it would be worth my time, and all praised Month-By-Month Gardening in Utah:

0 of 0 people found the following review helpful. Short and sweet. Don't expect an in depth guide on specific ...By Paul PopeShort and sweet. Don't expect an in depth guide on specific plants. This is more of a general stroke on what to do in the yard. Each month is covered in a few pages. Great supplement to more in depth guides. Gives you a good starting point without overwhelming you.0 of 0 people found the following review helpful.) It's kind of annoying to have to go through and find the month ...By Aaron R. LudwigI wish this book was organized just by month, and not by months within the individual categories. (trees, shrubs, vegetables, etc.) It's kind of annoying to have to go through

and find the month within each section. I've gotten a lot of good gardening tips from it though. 2 of 4 people found the following review helpful. Where is the help for perennials? By eskieme I bought this book within the first two months we moved to Utah (we're military) hoping it would help me identify and care for our perennial shrubs and flowers, as well as trees, native to Northern Utah. Instead, I got "0" information on caring for our new yard during the wintertime- something I was desperate to find out since we had just moved from Texas. Instead, the book focuses on universal, common sense information on how to care for your yard, and was not truly specific to Utah. In retrospect, even the general care information was not that informative. Go to your local nursery instead.

The Month-By-Month series is the perfect companion to take the guesswork out of gardening. With this book, you'll know what to do each month to have gardening success all year. Written by authors in your state, the information is tailored to the issues that affect your garden the most. When is the best time to plant trees and shrubs? Should I fertilize my lawn now? Is it time to prune my roses? What should I be doing in my garden this month? You'll find the answers to these questions and much more inside. This easy-to-use book highlights each of the ten major plant categories using a monthly format. It guides you through each month of the year, telling you exactly what your garden needs. It is like having an expert in the garden with you all year long. Valuable hints are located throughout the book, and beautiful photographs will inspire you. Written just for gardeners where you live, you can be confident that the information is right for you- and your garden will show it.

About the Author A regionally known gardening expert, radio and television host, author, columnist, and former horticulture specialist for Colorado State University Extension, John Cretti has more than 32 years of horticulture experience. John hosted the Gardening with an Altitude radio program for thirty years and has been an expert on Rocky Mountain Gardening for area TV and HGTV. His down-to-earth approach broadens the horizons of gardeners dealing with the unique and challenging climates of the region, where temperature fluctuations, wind, hail, unpredictable storms, difficult soils, and cunning critters are the norm. John has spent his life growing all kinds of plants, beginning as a child under the tutelage of his Italian grandmother, aunts, and uncle. This inspired his interest and passion for gardening while growing up in western Colorado. John is the author of several books for Cool Springs Press, including Rocky Mountain Gardeners Guide and Month-by-Month Gardening in the Rocky Mountains.
