Jan Prideaux : More One-Story Homes: 475 Superb Home Plans from 810 to 5,400 Square Feet before purchasing it in order to gage whether or not it would be worth my time, and all praised More One-Story Homes: 475 Superb Home Plans from 810 to 5,400 Square Feet:

A top 5 best seller is reborn! Home Planners takes a fresh look at the most popular type of house built today. Our

editors have done a thorough review of current and new designs, replacing over one third of the plans from the previous edition. Most of the new designs featured come from designers and architects new to this edition. The book opens with a home portfolio of beautiful color photography and rich renderings. Individual design chapters examine the full range of home styles: petite small homes, grand luxury homes, country classics, splendid traditional European designs, innovative Contemporaries and sun country splendors. Complete construction blueprints are available separately.
