**Marina Ubach, Pere Planells : More Spectacular Pools** before purchasing it in order to gage whether or not it would be worth my time, and all praised More Spectacular Pools:

5 of 5 people found the following review helpful. Think before you buy this book!By JerryI am in the process of designing a new back yard with inground pool and spa. I have been reviewing several books to get ideas. If that is what you are looking for - keep looking you won't find much here. This book is more of a photojournal of neo contemporary pools from around the world. It covers about 30 pools (most look the same). The majority of them are very contemporary recatngles with no decks. Just look at the cover - there are 29 more pools that look just like it inside. On the same note these pools are all in million dollar homes and are not very impressive unless you love plain, sleek, rectangular pools with minimal landscaping and concreate decks. Sorry I just didn't get it.

Few constructions better epitomize leisure and comfort than the swimming pool. Although at times pools serve landscaping or sporting functions, they are most associated with relaxation and leisure. This new collection features dozens of innovative pool designs from the United States, Tuscany, Spain, Marrakech and more. Pools continue to challenge architects, landscapers and homeowners to create serene beauty and peace; More Spectacular Pools is just the book to inspire such plans.

About the Author Christina Montes is the editor of Country Weekend Homes and Beach Weekend Homes previously published by Harper Design International, and also contributes to various magazines specializing in decoration and interior design and she lives in Barcelona, Spain.
