My son is 4 and has been using scissors since he was 2 and both of these books have really helped him to improve the hand eye coordination necessary to cut "properly". He now cuts on lines better and has gotten more comfortable with keeping a still scissor hand while the other hand turns the paper. My husband jokes that he will be the best scissor cutter in kindergarten because of these books. This book, in addition to cutting, works on pasting and I think that is also a necessary skill for early learners.

Typically to a child "more is better" but these books have shown my son that only a small amount of glue is necessary and he is careful to not over do it and therefor "ruin" his project with glue smears (sidenote: my son is a perfectionist). I look forward to buying the Lets Fold book as well as some of the other workbooks about letters and numbers.0 of 0 people found the following review helpful. Highly recommend!By Aysa DulaI wish I have known KUMON books before. My four-year daughter loves to cut and decided to purchased this one to give it a try. Honestly, she enjoyed and now she has control with scissors. She got better and enjoying the pictures with all activities of connecting and pasting the right part. Shes able to finish 10 pages in one sitting. The book is exceptional, thank you very much. I highly recommend KUMON books great for homeschooling and they have a good concept.0 of 0 people found the following review helpful. Nice book for children to learn cutting and pasting.By CP1999My son is working his way through this book.It starts where cutting left off. It slowly begins to increase the angles and curves in the cutting portion. Then he has to add the paste and glue it to the picture. Your child will slowly get used to reducing the white part of the color picture as the color borders need to match up with the big picture.He has no problem doing a page or two during his summer holiday to keep his skills sharp.

This workbook is designed to improve children's abilities with tools such as scissors and glue. Exercises start with cutting out illustrations and pasting them onto designated places on each page to complete a picture. Gradually the projects become more complex and eventually the child uses his or her own creativity to choose how to complete the picture.
