**Janice Busco, Nancy R. Morin : Native Plants for High-Elevation Western Gardens** before purchasing it in order to gage whether or not it would be worth my time, and all praised Native Plants for High-Elevation Western Gardens:

0 of 0 people found the following review helpful. Good for GardenersBy katmamaThis is a beautiful book! A wonderful reference for high altitude gardening. Very thorough information on when, where, how and what to plant to have a beautiful natural landscape. Well written, beautifully photographed. This book is not, however, a good resource for plant/flower identification because it is arranged in alphabetical order by the scientific name, which I seldom know. This is not a "field guide" per se, which might be arranged by flower color.1 of 1 people found the following review helpful. Great Book but I don't read Latin!By IdyGalI agree with the other reviewer on all points with a single addition. Since the plants are listed by their genus it can be difficult to find a particular plant by their more common name. That would have been helpful and is the only reason I rated it a 4 instead of a 5 star item. Otherwise a stunning book full of information with some beautiful photography.1 of 1 people found the following review helpful. Very

useful resource  
By Karen  
Comprehensive resource with pictures that will help with the decision of what and where to plant! Still a little foggy on what zone I am in but I will figure that out soon.

150 species of native plants guaranteed to be low-maintenance successes for people who live in the high-altitude regions of the American West (5,000 feet and above).

About the Author  
Janice Busco has 20 years experience with Western native plants as an environmental horticulturist, consultant, and educator. She has served as co-director of the Theodore Payne Foundation for Wildflowers and Native Plants in Sun Valley, California, and as horticulturist at The Arboretum at Flagstaff. Nancy R. Morin worked for 15 years at the Missouri Botanical Garden, eventually becoming the assistant director, and another 3 years as executive director of the American Association of Botanical Gardens and Arboreta before coming to Flagstaff to serve as director of The Arboretum at Flagstaff.
