Michael Powell, Shirley Powell : Native Plants in Landscaping: Trees, Shrubs, Cacti, And Grasses of the Texas Desert And Mountains before purchasing it in order to gauge whether or not it would be worth my time, and all praised Native Plants in Landscaping: Trees, Shrubs, Cacti, And Grasses of the Texas Desert And Mountains:

1 of 1 people found the following review helpful. Not his best effort By Glenn Hall I didn't really like this one that well, although I have read other books by Powell that I liked a great deal. 0 of 0 people found the following review helpful. Native Plants in Landscaping: Trees, Shrubs, Cacti and Grasses By Paula Anson Great book! And with trying to conserve water---native is the way to go. 2 of 2 people found the following review helpful. Native Plants in Landscaping-Texas Desert and Mountains By C. Collins I have recently purchased land in the Northern Chihuahuan Desert in Texas. This excellent book is proving itself invaluable to me. Excellent primer for growing and landscaping with plants which do not have high water requirements.

The only book on ornamental plants dedicated to the remarkably cold-hardy and arid-adapted native species of Trans-Pecos Texas. The potential of these trees, shrubs, succulents, cacti, and grasses for use in the landscape, both within and beyond the borders of their native habitats, has been only superficially tapped. Yuccas, Ceniza, Texas Mountain Laurel, and Salvias are already familiar to native plant enthusiasts. But hundreds of essentially unknown plants with ornamental potential await discovery, propagation, trial, establishment in the nursery trade. You will find them treated here.

About the Author Michael Powell is a widely published author and expert on the native plants of Trans-Pecos Texas. Retired professor of biology. Shirley Powell has done extensive field work in West Texas collecting seeds and plant specimens for taxonomy classes and propagation trials.
