It delves into all aspects of feeding and I was disappointed to see that putting out bread and baked goods was among the recommended feed for backyard birds. This has been discouraged because there are no real nutrients that the birds need, and it will just fill them with empty calories. That being said, it is an informative read, with Julie's wonderful sketches. I plan on leaving it out in one of my guest rooms for an easy read.4 of 4 people found the following review helpful.
