John Diekelmann, Robert Schuster : Natural Landscaping: Designing With Native Plant Communities before purchasing it in order to gage whether or not it would be worth my time, and all praised Natural Landscaping: Designing With Native Plant Communities:

0 of 0 people found the following review helpful. Not for HomeownersBy S. SaurersFew photos, not very helpful for homeowners. Geared toward landscape architects and as a teaching tool.0 of 1 people found the following review helpful. Not what expected. Expected information on native plants for ...By Joe CollinsNot what expected. Expected information on native plants for home use.36 of 44 people found the following review helpful. Essential resourceBy A CustomerNatural Landscaping is an essential resource for anyone interested in landscaping with native plants. The importance of learning to use native plants is so important as we face continuing droughts in various parts of the country, including here in Williamsburg, VA. The book is so full of information that I find myself going back to it often. Many thanks to the authors for this fine volume.

In response to demand from landscape architects and home gardeners, Natural Landscaping returns to print in an updated and expanded second edition. It is unique in its focus on plant communities; it approaches landscape design as the establishment of natural ecosystems, rather than mere planting of specimens. Emphasizing the natural landscapes of the northeastern United States and eastern Canada, this booko reviews landscaping principles and techniqueso introduces native plant species for grasslands, forests, edge areas, and small wetlandso illustrates how to evaluate a site

and plan for visual effect and maintenanceo presents the issues involved in restoring bogs, ponds, and other wetlandso offers practical advice on reducing chemical use while still combating invasive plantso addresses social, legal, design, and planting problems often encountered on residential siteso discusses natural landscaping for public parklands, civic buildings, school grounds, and corporate properties

"[Makes] landscaping with native plants a promise of nature's beauty at one's doorstep." Joan Lee Faust, The New York Times
