By Thomas One Straw Revolution is Fukuoka's farming philosophy thesis and The Natural Way of Farming explains how to put Fukuoka's philosophy into practice by detailing each of his farming methods. It explains everything mentioned in One Straw Revolution such as which crops to use as green manure and Fukuoka's recipe for seed balls. While One Straw Revolution reads like a prose Tao Te Ching, The Natural Way of Farming

reads like a university science textbook due to its in-depth descriptions of Fukuoka's personal farming research. This is the perfect book to use as a practical followup to One Straw Revolution especially if you are interested in transferring Fukuoka's practices to your garden. Fukuoka has an extensive bibliography but only two of his works are currently published in the United States, One Straw Revolution and Sowing Seeds in the Desert. Therefore, The Natural Way of Farming is shipped from India where it is still being published in English. This book arrived in only four days with an expedited shipping charge of \$6.99. It was in pristine condition even after being opened by customs. 2 of 2 people found the following review helpful. The book's PDF may be easily found online but it would have been nice to have a (complete) hard copy. My refund process is on its way and I expect no problem there. 1 of 1 people found the following review helpful. GreatBy hobbyroomthis man worked his way from regular farming to nature friendly farming. the book is very informative and the pics show how he redid the traditional farm into a natural environment where everything thrived. Great book
