Soil is a living organism that loves to cooperate with farmers and gardeners. A green thumb will appear on those who align themselves with its health and requirements. This book discusses: Soil habitat Sustaining soil fertility The soil food-web Nutrient availability and deficiency After reading this book, readers will not only have a different view on soil, but on weeds as well. Knowing and utilizing the energies and characteristics of weeds, as Gilman teaches, will make for a more productive garden, and less stressful gardening.

About the AuthorSteve Gilman is a NOFA member and a farmer in New York State.
