Mark E. Byrnes, David A. King, Philip M. Tierno Jr. : Nuclear, Chemical, and Biological Terrorism: Emergency Response and Public Protection before purchasing it in order to gage whether or not it would be worth

my time, and all praised Nuclear, Chemical, and Biological Terrorism: Emergency Response and Public Protection:

This book provides guidance on measures that should be considered to protect human lives from terrorist activities involving nuclear, chemical, and biological weapons. It provides a historical summary of the development and use of these weapons, and continues with a detailed discussion of the types of radiation and warfare agents that are available, including methods for dispersing them. The text also analyzes human exposure to radiation or chemical and biological agents, along with treatment methods that are available to treat exposed individuals. The authors provide an exploratory look at emergency preparedness measures that can be enacted to mitigate future emergencies, including training techniques and strategies.

"This is a very timely book with a concise but comprehensive review of various aspects of nuclear, chemical, and biological terrorism. The authors have done a great job in putting together useful information. a useful addition to any library." - E-Streams, Vol. 7, No. 6, 2004
