Log Home design has long been dominated by books about the technique of log construction or the technical aspects of the design process. On Design helps us reflect on how we actually live in our log homes so we might better think about how we design the spaces we inhabit. In order to succeed, our homes must serve us...by creating spaces that speak to us: creating an environment that grounds our being, an appreciation of finely-crafted material, a relationship with the natural world beyond the walls...translating what is not physical -emotional, psychological and cultural

qualities--into a physical form--our log homes.
