**Fernando de Haro, Omar Fuentes : Open Spaces: Smallbooks Series (English and Spanish Edition)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Open Spaces: Smallbooks Series (English and Spanish Edition):

1 of 2 people found the following review helpful. Small Book? Wrong series Name.. Photo BrochureBy W. WebbFor the Mexican Publishing House, AM Editores, who have released some good books in the past, series as Arquitectos Mexicanos, Espacios, and others, which nothing more than a collection of pretty photos without any architectural details, or drawings, and a directory of architects, which shows that the publications are just paid advertisement, and

not a selection of architecture selected by the value of design. The Small Book series is probably deceiving, as they are actually not small books, but thin, and very thin high quality brochures with a collection of photos that have already been published in prior collections. At a modest price of 2.5 Dollars in Mexico, they cater to the architecture student, and the occasional architecture reader, who are eager to see some of the 'cool' and contemporary projects done by the not so famous Mexican Architects, often young and emerging. I would skip the entire Small Book series collection, and buy their other full sized books.

A series that offers examples and clear ideas of 20 different themes through a meticulous compilation of the best and it more representative of the architecture and interior design of the present time.

About the Author Fernando de Haro and Omar Fuentes are internationally acclaimed architects and collaborators on the successful series Mexican Architects. They live in Mexico City.
