Outdoor Rooms is a beautiful guide to some of the best terraces, porches, patios, gazebos, sunrooms, and garden rooms created by designers, architects, landscapers, and homeowners. It presents spaces both small and large, in the city, in the country, and at the beach. It also includes a chapter on the best in furniture, lighting, accessories, and materials. It is an inspirational look at what one can do to create beauty and comfort in any outdoor space.

An invaluable design resource. -- Form Zero Architectural Books and Taylor Company, May 1999
Outdoor Rooms explores how designers, architects, and landscapers create places for enjoying what's beyond the walls of an interior. -- Design Times, Spring 2001
From the Inside Flap According to the humorous social critic Fran Lebowitz, "the outdoors is what you must pass through to get from your apartment into a taxicab." For homeowners today, the spaces between two forms of shelter are more than incidental atmosphere. Outdoor rooms have become the hearth of the home--often literally with exterior fireplaces. In today's busy world, where leisure time is precious, people want the most out of their homes, and are bringing comfort to all living spaces--inside and out.
