This very informative book tells you about wildflowers, perennials, shrubs and trees (along with beautiful photos) what type of soil they need, if they like sun or shade, what color, (if any) their blooms are, when they bloom, how long they bloom, and how large they'll get. It has helped me plan my landscaping beds a lot!1 of 1 people found the following review helpful. We have Iris's that are 50-100 yrs old but I intend to put out lots of perennials. We want to cover as much grass as possible with xeriscaping, Crepe myrtles and privet do well in Georgia.I love the book and all the information,pictures and I will now use it forever. It's a real treasure for me and it should be on EVERYONE's bookshelf.
