Anna Castiglioni : Plan to PLANTed!: Landscaping Your Home in Southern California before purchasing it in order to gage whether or not it would be worth my time, and all praised Plan to PLANTed!: Landscaping Your Home in Southern California:

1 of 1 people found the following review helpful. super basic. Not very helpful if you are looking ...By EmNot a lot to this book. Vague, super basic. Not very helpful if you are looking for some clear ideas of what plants to use in Southern California.0 of 0 people found the following review helpful. Short but goodBy Heather PhillipsNot as detailed as I might have wanted, but full of solid information and advice for the San Diego area as far as it goes. I appreciated the local garden resources list.

Professional tips on planning and design of a beautiful yard that is low-maintenance, water efficient, cost-effective, and functional. I earned my Bachelor of Landscape Architecture from Texas AM in 2005 and have been working professionally in the industry for over 10 years. I have been involved in managing and designing a plethora of projects large and small, including commercial retail, street-scapes, and residential. Though the particular plants presented here are largely California natives, the tips on planting and irrigation can be applied pretty much anywhere.
