A ready list of plants appropriate for any given area (light conditions, toxicity, etc.). Love it, if for no other reason the list of toxic plants to avoid.24 of 25 people found the following review helpful. A must for people who love children and/or plantsBy Rascal the CatIn one easy reference volume, you can find what plants to plant for what purpose, (shade, climbing, play materials, etc.) and also a very handy section on what not to plant (toxic!). Very helpful for parents and for anyone responsible for outdoor play environments.0 of 0 people found the following review helpful. Five StarsBy Thomas NorquistRobin's guide to playful plantings is a must if you care about your children!
