**Kevin Stead : Plumbing (Revision and Self-Assessment)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Plumbing (Revision and Self-Assessment):

Kevin Stead offers an accessible approach to learning, revision and reinforcement based round key information and assessments rather than extended text. This book is ideal for students both working alone and in class. Each topic begins with a summary section followed by a detailed glossary of terms and explanatory notes. Every chapter ends with a variety of exercises, multiple-choice questions and an answer section for the reader to check their understanding. This makes Plumbing an accessible course text for a wide range of students providing preparation for

City Guilds tests as well as building a strong foundation of underpinning knowledge for NVQs.

"Excellent inclusion of multiple-choice questions" College Lecturer "helps students with practical tasks and assignments" Head of Plumbing From the Publisher Topics such as gas supply, oil supply, cold and hot water supply are covered in detail and yet remain accessible and understandable. Each topic begins with a summary section followed by a detailed glossary of terms and explanatory notes, and ends with a multiple-choice assessment to allow the reader to check their progress. All answers are provided. Students of plumbing and mechanical services will find this a stimulating and useful revision aid. About the Author on behalf of Leeds College of Building, UK
