good book for the complete beginner.0 of 1 people found the following review helpful. Not much here.By SSBI guess I was looking for more information. This book has a few interesting projects but the look rather crude. I think that I could have done better considering what I spent.5 of 11 people found the following review helpful. Elegant designsBy CustomerThe designs are elegant, both graceful and sturdy. Any woodworker with a new yard or garden should be able to build these and display with pride. However, I've had the same yard for many years and am supplied with all the projects that are suitable for my yard. Since I'm more interested in the yard and garden than in woodworking, I'll skip this one, at least until I need some new projects.
