**Marta Serrats : PreFab Houses DesignSource** before purchasing it in order to gauge whether or not it would be worth my time, and all praised PreFab Houses DesignSource:

2 of 2 people found the following review helpful. Great little fat informative book with lots of pics! By wide eyed childAs we are in the process of deciding whether or not to purchase a prefab, I wanted a book to a) give us an idea of what's available/possible, and b) get us motivated. This little book did both! It's small yet extremely chunky size makes it perfect for taking with us on drives into the country, where we can make big plans on a tiny budget. 0 of 0 people found the following review helpful. Five Stars By Brian Battle Great book for anyone interested in a pre-fab modern home. Lots of pictures 2 of 3 people found the following review helpful. clear information By alex This is a must have book if you're interesting on prefabrication. It gives plenty modern prefab projects from all over the world with description, images, plan, and details. If you want to find further information, you can find it in the internet. (too bad it

doesn't come with date of project so I need to find it by myself-but I personally don't think it gonna be a deal breaker)The price is also reasonable.

Prefab Houses is a handy, portable guide to the 21st century's most stylish, affordable, innovative, and adorable prefabricated homes. Design editor and architectural expert Marta Serrats provides an eye-opening compendium of prefabricated living spaces that are miles above mobile homes and other less desirable home life options—a valuable resource featuring breathtaking, cost-effective possibilities for anyone interested in building an attractive, affordable first or a second home.

From the Back Cover For many, the idea of prefab housing may bring to mind trailers and other less desirable images of home life. But this idea couldn't be more wrong! Rather, the newest trends in prefab have emerged as a great way for a design- (and cost-) conscious generation to achieve the dream of home ownership. Today, prefab houses are manufactured to the highest standards of construction and aesthetics. And with the internet, these houses can be ordered from all over the world—affording people everywhere the opportunity to acquire an affordable home of distinction. Prefab Modern explores the best prefabricated houses on the market today, from all over the world along with a resource directory on how you can purchase them. Included are case studies from all over the US and around the world, from top architects and designers. Prefab is the inevitable next step to "cool" housing as the market looks for reasonably priced housing for first and second homes. Prefab Houses Designsource is the perfect guide to this undeniable and fascinating trend. About the Author Marta Serrats is a design editor for Loft Publications, and an expert in architecture and store displays. She is the author of such highly acclaimed titles as *New Shops and Boutiques*, *Capturing Space*, *Point of Purchase*, and *Unique Packaging*.
