I really liked how they had side bars where they explained various new technologies. also enjoyed all the different houses they showcased and explained what they had done, how they did it and then rated the houses on their sustainability rating. this book really opened my eyes to sustainable prefab housing options.1 of 1 people found the following review helpful. Great book to see alternatives to old school construction methodsBy w j cavanaughLove this book by Sherri Koones. We are design build general contractors who build with off-site modular construction .. Our company USModular Inc. ( [...] ) gives this and other books by Sherri to prospective clients to help them visualize their new home and the possibilities of design with modular construction. Perfect book to show that modular construction is better than site built . Bill Cavanaugh USModular Inc. [...]
