I found it visually informative in terms on interior design sensibilities. Thank you. 11 of 12 people found the following review helpful. Not a lot of content By A Customer Beautiful pictures. Pictures only, with a brief title at the end of each section. A good small book to take on a drive to augment the scenery, as you can talk while you glance through it. My copy is falling apart even though it has been barely handled. This book doesn't evoke for me the mood of Provence, just the mood of someone else's vacation. I would describe it as the vacation photos of a stranger. I still gave it three stars because the photos are beautifully

done1 of 3 people found the following review helpful. A small mental trip to Provence...By Gordon LynExcellent!!
I've given several as gifts to friends. Wonderful things do often come in small packages!

Traverse a wordless cross-section of Provence images, each as lovely as one would imagine in one's dreams, together with a vivid mosaic of Provencal living.
