Steven Holl, Juhani Pallasmaa, Alberto Perez-Gomez : Questions of Perception: Phenomenology of Architecture before purchasing it in order to gage whether or not it would be worth my time, and all praised Questions of Perception: Phenomenology of Architecture:

0 of 1 people found the following review helpful. I can't ask more!By PrisA revealing reading for whoever is curious about perceiveng the space he/she lives in, passes through, comes across, etc...much more important for people who have the responsibility for making or changing these spaces.Post service super fast and excellent conditions of the product, when I received it, have made this purchase perfect.0 of 1 people found the following review helpful. Three StarsBy pominteresting book6 of 10 people found the following review helpful. typesetting detractsBy R. SandfordExcellent essays but the typesetting makes it a difficult read (the font is extremely small.)

This new edition of Questions of Perception brings back into print one of the most important architectural theory

treatise of recent years. Authored by noted architectural scholars Alberto Prez-Gmez and Juhani Pallasmaa as well as the preeminent architect Steven Holl, the three separate essays are thematically linked: each one tries to explain the role human perception and phenomenological experience play in architecture. In particular, Holl -- who was named by Time magazine as the most important architect of his generation and the designer of the much-lauded Chapel of St. Ignatius at Seattle University and the highly anticipated Nelson-Atkins Museum of Art addition -- lucidly explicates the importance of intuition in the construction and experience of built space. Holl explains his search for phenomenological experience thus: "To open architecture to questions of perception, we must suspend disbelief, disengage the rational half of the mind, and simply play and explore. Reason and skepticism must yield to a horizon of discovery."
